

# Canvas Care Sheet

Dear Customer,

Many thanks for choosing a canvas print for your living or work space. In order to keep your print looking as vivid and vibrant as the day it was made, please read the following care advice:

- Keep your print away from direct sunlight, as well as reflected light from mirrors, glass etc.
- Do not use any form of liquid or chemical products to clean your canvas, even if you have a coating. A soft brush can be used periodically to remove any settled dust.
- Make sure your print is displayed at room temperature in a stable moisture-free environment and is kept at a safe distance from any sources of direct heat such as a fireplace or a radiator.

Follow these steps and your canvas will continue to brighten your space for years to come.

## Hanging Kit Info

Our hanging kits are designed to be very easy to use, please see the diagram on the right for an example of how they should be used. We recommend using two screws as shown in order to fix the hanging plate to the rear of your print.

**Please note:** For frames without a centre brace, only one kit should be used in the centre of the piece. When a centre brace is present, use both kits supplied. Please use an alternative picture hook if the one supplied is not suitable for your wall type.
